

see what Delta can do™

DIAMOND™ Seal Technology

Durability comes from within.

DIAMOND™ Seal Technology offers performance you can have confidence in long after installation. Delta® Faucet has harnessed the world's toughest material to make the most durable and reliable faucets in the industry. In fact, faucets with DIAMOND Seal Technology last for up to five million uses.

Easy to work with. Easy to count on.

Longer Lasting.

Engineered to last up to 10 times longer than the industry standard*.

*Industry standard based on ASME A112.18.1 of 500,000 cycles.

Leak-Free.

The threat of leaks is all but eliminated thanks to the exclusive one-piece InnoFlex® PEX supply lines, DIAMOND™ Valve and no dynamic seals.

Less Hassle.

Minimum of 32 inches of InnoFlex PEX waterways are included, saving you the cost of additional supply lines.

Lead-Free.

Once inside the faucet, water is not in contact with potential metal contaminants.

Technology that's tough to beat.

DIAMOND™ Valve

- Diamond-embedded ceramic valve polishes away calcium buildup, eliminating need for lubricants that wear away and keeping handle operation like new for the life of the faucet
- Eliminating dynamic seals ensures water stays where it belongs, eliminating leaks

DURAMOUNT® Mounting System

- Quick, tool-free installation
- Corrosion-resistant
- Standard on most single-hole deck-mount models with escutcheons
- Innovations® lavatory tested to over 500 lbs. (227 kg.) of loading without cracking, bending or splitting

InnoFlex® PEX Waterways

- Easier to install, manipulate and cut than standard copper risers
- Keep potential metal contaminants away from water inside the faucet
- Minimum of 32" of supply lines below deck
- Stress-tested for up to 500 psi (3,448 kpa) and 200° F (93.3° C)
- Resistant to freeze damage
- Will not pit, pinhole, scale or corrode

Diverter Housing

- Deck-mount kitchen models come standard with integrated below-deck diverter housing
- Can operate with or without a sprayer
- Sprayer can easily be added at any time

Metal Where It Matters

- Our goal is to ensure that water does not come into contact with metal once inside the faucet
- The key components of our faucet body, handle, and stainless steel valve stem remain constructed with the same uncompromising strength of metal that you've come to expect from the Delta brand

Versatile

- Available in single- and two-handle models in kitchen and lavatory faucets
- Allows for Touch2O® Technology
- Widespread models mount from 4" to 16" centers

When your project requires durability and longevity, you can count on the performance and simplicity of faucets with DIAMOND Seal Technology. It's all a part of Delta Faucet's commitment to innovation and making our customers' lives easier.

Durability that's beautiful and functional, too.

Pull-down faucets from traditional to contemporary style. Lavatory models in single-handle or widespread. Touch₂O[®] and Touch₂O._{xt}[™] Technology faucets. You'll find DIAMOND[™] Seal Technology in a variety of faucet configurations, and in nearly every style or functionality that Delta Faucet offers.
