

# Delta<sup>®</sup> Smart Solutions.

## Touch<sub>2</sub>O<sup>®</sup> Technology.

With Touch<sub>2</sub>O Technology, it doesn't matter if you have two full hands or 10 messy fingers, tap anywhere on the spout or handle and the water is running.

## H<sub>2</sub>Okinetic<sup>®</sup> Technology.

H<sub>2</sub>Okinetic showers sculpt the water into a unique wave pattern, giving you the feeling of more water without using more water.

## Touch<sub>2</sub>O<sup>™</sup>.xt Technology.

A simple touch anywhere on the spout or handle turns the water on and off. For an even cleaner experience, Touch<sub>2</sub>O<sub>.xt</sub> Technology intuitively activates the water flow when your hand moves close to the faucet for a complete hands-free experience.

## In2ition<sup>®</sup> Shower.

With two showers in one, the In2ition Shower gives you water anywhere you want it. The showerhead features a detachable handshower, which can run separately from or simultaneously with the showerhead.

## DIAMOND<sup>™</sup> Seal Technology.

DIAMOND Seal Technology for the kitchen and the bath. When a valve with a tough diamond coating combines with InnoFlex<sup>®</sup> PEX waterways, you get a faucet built to last.

## MultiChoice<sup>®</sup> Universal.

Shower enhancements made easy. By having the MultiChoice Universal valve installed behind the wall of your shower, it is easy to change the shower style or function.

From the beginning, Delta has sought out innovative answers that flow from human insights. There can be magic in simple solutions to help people use water in better ways. These smart features, found across our offering, are helping to transform daily life with water.

### MagnaTite® Docking.

MagnaTite docking keeps the kitchen pull-down spray wand or In2ition handshower firmly in place with a powerful integrated magnet, so it stays docked when not in use.

### EZ Anchor® System.

The EZ Anchor mounting system simplifies faucet installation by allowing the kitchen or bath faucet to be mounted from above the sink without having to go under the sink to tighten the faucet. This secures the faucet to the deck, helping prevent the faucet from loosening over time.

### Temp<sub>2</sub>O™ Technology.

Get the right temperature every time. An LED display shows the temperature as well as a specific color for the temperature range. Available in handshowers, shower heads, tub and shower trim and valve only trim.

### Water-Efficient Products

When it comes to using water, we believe less is more. Delta bath faucets are built with a more efficient flow rate that saves up to 32% more water.\*

\* WATER EFFICIENT PRODUCT:  
Flow Rate of 1.5 gpm (5.7L/min)  
versus Industry Standard  
ASME.A112.18.1/GSA.B125.1  
of 2.2 gpm (8.3 L/min).

### WaterSense® Partner of the Year.

In 2014 Delta Faucet Company was named WaterSense® Partner of the Year for its ongoing commitment to advancements in water efficiency.

WATERSENSE® is a registered mark of the U.S. Environmental Protection Agency.
