Delta Faucet Company Introduces the Essa™ Kitchen Collection

Modern technology delivers euro-inspired design to the kitchen

Appealing to consumers and designers looking for a euro-inspired design, Delta Faucet introduces the new Essa™ collection - a soft contemporary take on a euro design with subtle detailing accents that allow it to be placed in both contemporary and transitional spaces.

For added appeal, the Essa kitchen collection comes with optional Touch₂O® Technology featuring TempSense™. Touch₂O Technology in the kitchen lets the user activate the flow of water by tapping anywhere on the faucet spout, hub or handle. With TempSense Technology, an LED light at the base of the faucet changes from blue to magenta to red, visually indicating the temperature of the water to the user.

"With optional Touch₂O and TempSense Technologies, the Essa collection effortlessly merges contemporary design with modern innovations," said Elliott Thompson, product manager, Delta Faucet. "The suite fulfills the consumer desire for functional beauty in the home."

Additionally, the Essa collection is equipped with MagnaTite® docking, which keeps the kitchen pull-down spray wand firmly in place with a powerful integrated magnet, so it stays docked when not in use.

The full kitchen suite is comprised of single-handle pull down and bar/prep faucets, as well as coordinating soap dispensers and beverage faucets with optional touch technologies, offered in Chrome, Arctic® Stainless, Venetian Bronze® and Matte Black finishes.

The Essa kitchen collection is available now at kitchen and bath showrooms and select retailers. Pricing starts at \$385 for bar/prep faucets and \$409 single-handle pull down faucets.
