## Delta® Tesla™ Bath Collection Reflects Unexpected, Modern Design

Set apart from typical modern designs with its divergence from cool, straight lines, the Tesla™ Bath Collection is an elegant, soft, contemporary solution for homeowners, designers and builders looking for a warm, modern collection with clean lines.

Inspired by unique, gently curved, organic shapes found in nature, this collection was created with urban high-rises in mind. It goes beyond expectations by lending a spirited sense of the outdoors to any interior.

The Tesla collection provides a fresh take on modern design. Rather than being simply sleek or minimalistic, the collection is progressive, organic and evolved - an exciting, softer approach that defies standard definitions of modernity to fit naturally in any bathroom environment.

Boasting Delta Faucet Company's first joystick lavatory faucet, the collection also includes optional Touch2O™ Technology, which activates the flow of water with a simple touch anywhere on the faucet and/or via intuitive, hands-free proximity sensing when your hand moves close to the faucet. When paired with TempSense™ Technology, an LED light at the base of the faucet changes from blue to magenta to red; visually indicating the temperature of the water to the user.

The Tesla Bath Collection features a full suite of products, including single-handle and vessel lavatory faucets, a free-standing tub filler, wall mount and widespread faucet options, single and dual-function pressure balanced showers with H<sub>2</sub>Okinetic® Technology, TempAssure® dual-function thermostatic showers with H<sub>2</sub>Okinetic® Technology, diverters, Roman tubs, a light sconce and other matching accessories.

The collection is available now in Chrome, Brilliance® Stainless and Polished Nickel finishes, starting at \$400.
